COVER

“Le Gourmet,” painted in 1901 by Picasso (1881-1973) during his “Blue
Period,” demonstrates the natural appetite of the small child, who appears
well nourished and even is eating standing up. Eating problems in children
are not inherent in their stage of development but are their response to
adverse environments. The blue color, however, suggests a threat to this
healthy state. Child health professionals must balance this innate healthy
aspect of childhood against the environmental threats to their well-being
and be advocates for the healthy development of children. (This painting is
from the National Gallery of Art’s Chester Dale collection and is
reproduced with permission.)
