Another Cause of Parotitis

A case of mumps parotitis was presented in a previous section of Index of Suspicion (Quion N, DeWitt G. Mumps parotitis. Pediatrics in Review. 1995;16:349-351). Dr Marcelo Laufer of the University of Miami points out that parotid gland enlargement is a manifestation of human immunodeficiency virus (HIV) infection and that clinicians must consider this disorder in the differential diagnosis of parotitis. Infectious disease consultants point out that although children who have HIV infection are more susceptible to mumps, most of the parotitis seen in these children is probably caused by the HIV agent itself.

Continuing Education Programs

Spring Session
Chicago, Illinois
April 13–17, 1996

Annual Meeting
Boston, Massachusetts
October 26–30, 1996

Pediatric UPDATE Audio Tapes

Selected topics include:
- Minimally Invasive Surgery
- Urinary Tract Infections
- The Febrile Infant and Toddler

To enroll in Pediatric UPDATE, call or write:
Pediatric UPDATE
2 Seaview Blvd.
Port Washington, NY 11050-4618
800/847-0088

Continuing Medical Education Courses

Current Concepts in Pediatrics
Vail, Colorado
January 11–14, 1996

State-of-the-Art Pediatrics
New York, New York
April 19–21, 1996

New Directions in Pediatrics
San Antonio, Texas
February 1–3, 1996

Pediatric Advances
Santa Fe, New Mexico
May 17–19, 1996

Pediatrics 1996
Orlando, Florida
March 8–10, 1996

Clinical Pediatrics
Washington, DC
June 21–23, 1996

PREP: THE COURSE
April 19–24, 1996
Nashville, Tennessee

September 27–October 2, 1996
Philadelphia, Pennsylvania

June 7–12, 1996
Portland, Oregon

November 1–6, 1996
Kansas City, Missouri
