- 448 Wilson Disease**

### DEPARTMENT OF CORRECTIONS

- 425 Erratum**

### INDEXES

- 449 Cumulative Author Index**
- 453 Cumulative Subject Index**

### COVER

Each of our 1996 issues of *Pediatrics in Review* will feature a work of art submitted to our cover art contest this past year. We received more than 200 entries and have chosen 12 to appear on our covers—four from each of three age groups: 5 to 7 years, 8 to 10 years, and 11 to 15 years. The entrants were asked to submit a drawing of what they like to do best. Most of the entries will be displayed by the American Academy of Pediatrics at various sites. This month's work, by 11-year-old Joy Kragenbrink, is of her doll, Maria (or any child), in a tree (or any other exciting place) at night to tell her what it's like being in that place. Joy has cerebral palsy-spastic quadriplegia with significant motor impairment. She is unable to use her hands to draw, but she works very patiently to create art on her computer. This picture took Joy 40 to 60 hours to create. Joy lives in Elkhorn, Wisconsin; her pediatrician is Deborah McLeish, MD.
