Abstracts of articles in Pediatrics in Review online-only pages appear on this page. The complete articles are available only online so that Pediatrics in Review can provide you with even more original pediatric content. These online-only articles are indexed in Index Medicus, MEDLINE, and PubMed, among other services.

Pediatrics in Review online is the journal of record. It contains the full content of each print issue (including all figures and tables) from January 1979 to the present. The full online text is searchable by keyword and author, and the cited references include hyperlinks to MEDLINE and to the full text of many other online journals. Although continuing medical education (CME) quizzes for all issues also can be accessed online, the journal will not be adding CME quizzes to the 2013 online-only articles; however, most of the online-only articles cover content specifications used by the American Board of Pediatrics to prepare the cognitive examination in their Program for Maintenance of Certification. Subscribers can access this content by visiting the online-only pages of Pediatrics in Review at: http://pedsinreview.aappublications.org.
